

Reman Balak

Web Developer

Full-stack Developer with a 3-year background in Business Development, showcasing a year of hands-on software development experience gained primarily through personal projects. Proficient in crafting both client-side and server-side solutions using tools like React, Node.js and JavaScript.

WEB PROJECTS

Meet App | [Link to Project](#)

- Implemented a React-based Progressive Web Application (PWA) for seamless cross-platform usage, enabling offline accessibility and empowering users to add the app to the home screen.
- Utilized a test-driven development approach by translating user stories into rigorous testing scenarios.
- Employed AWS Lambda for serverless authentication and OAuth-based authorization.

CineVibe | [Link to Project](#)

- Orchestrated a user-friendly movie application, enabling user registration and login to save favorite movies while providing comprehensive genre, director, and summary details.
- Leveraged the power of the MERN stack (MongoDB, Express.js, React, and Node.js) to create a flexible and efficient web application.
- Developed a scalable RESTful API utilizing Node.js, Express.js, and Mongoose, facilitating seamless communication between front-end and back-end systems, resulting in enhanced responsiveness.
- Designed and created the application's front-end using React, ensuring a responsive and intuitive user interface.

PROFESSIONAL EXPERIENCE

Amplee, Cologne – Frontend Developer

Nov 2023 – Present

- Independently designed and developed a robust Single Page Application (SPA) using React, showcasing expertise in front-end technologies. The SPA features seamless user authentication, enabling users to efficiently create accounts and log in.
- Innovatively integrated the ChatGPT API into the application, leveraging advanced AI technology to create a project creation form. This intelligent AI agent facilitates swift candidate and freelancer searches based on user inputs, significantly improving the efficiency of talent discovery.
- Created a MongoDB database backend for the SPA, ensuring secure and efficient storage of user and project data. This strategic use of a NoSQL database enhances data retrieval and management capabilities, contributing to the overall performance of the application.

D&P Parfum, Cologne – Office Administrator

June 2021 – Nov 2023

- Demonstrated professionalism in customer and franchisee communication via phone and email, resulting in a 15% increase in repeat purchases and a 20% reduction in complaints through effective strategies.
- Identified inefficiencies in customer order entry and management processes and executed improvements with accuracy, resulting in a significant reduction of 1 hour per day in processing time, enhancing overall efficiency.
